REASONS FOR ALLOWANCE

1. Claims 1-30 and 32-36 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of an apparatus comprising a modular multiplier including a plurality of independent computation channels wherein each capable of performing an independent modular multiplication operation; and a coupling device interposed between computation channels as cited in independent claims 1, 9, 17, 23, and 27. Further, the prior art of records fails to disclose or render an obviousness of a method comprising receiving a data value at a first end of a systolic array multiplier from a second end of the systolic array multiplier; receiving a data value or a channel data from a multiplexer; and providing either the data value from the second end of the systolic array multiplier or the channel data input signal to the first end of a systolic array multiplier via an output of the multiplexer as cited in independent claim 32.

The closest found prior art is Weixin et al. ("A Systolic Linear Array for Modular Multiplication"). Weixin et al. disclose an apparatus comprising a modular multiplier including a plurality of independent computation channels and a coupling devices interposed between computation channels. However, Weixin et al. fail to disclose each computation channel capable of performing an independent modular multiplication operation; and providing either the data value from the second end of the systolic array

multiplier or the channel data input signal to the first end of a systolic array multiplier via an output of the multiplexer as cited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
